## Learning Outcomes need to be S.M.A.R.T

- S** • **Specific:** State exactly what you want to accomplish (Who, What, Where, Why)
- M** • **Measurable:** How will you demonstrate and evaluate the extent to which the goal has been met?
- A** • **Achievable:** stretch and challenging goals within ability to achieve outcome. What is the action-oriented verb?
- R** • **Relevant:** How does the goal tie into your key responsibilities? How is it aligned to objectives?
- T** • **Time-bound:** Set 1 or more target dates, the "by when" to guide your goal to successful and timely completion (include deadlines, dates and frequency)

## Teaching-Learning and Evaluation

### Learning Paradigm Implications

1. Focus on 'Production of learning' and not on 'delivery of instructions'
2. Focus on 'Why and how learners learn' not on 'what and how faculty teach'
3. Faculty to do 'less teaching' and learners do more 'active learning'

Brain's learning, which involves cognitive tasks in ascending order of complexity, appears to be supported by numerous regions. Learning, understanding, memory, and emotion through active learning techniques increase performance.

the IMPOWERUP requires Learning Learning
